

Artificial Intelligence (AI)

ARTIFICIAL INTELLIGENCE (AI). The Hebrew Scriptures are replete with references to AI. We don't see it because it is at the Sod level of Scriptural interpretation. Sod is the esoteric or hidden level. It is there in the background or backdrop of the event. For example, all the miracles of the Exodus from Mitzrayim combine Angelic and AI intervention. The reason we don't see it is because we want to believe that Elohim alone worked the miracles. Of course, Elohim did everything, but He used AI to wheel and direct His power. Is that so hard to believe with what we have achieved ourselves? We have created technology today that can artificially create the weather, i.e., if they want to create a storm or a tornado, they can do it, even floods and earthquakes. It is called Geoengineering. What about a pillar of fire or raining down hail as fire? Some of you will be surprised to learn they have already achieved the feat. It has been around for some time, and they have used this AI technology to create fires and lightning. Artificial intelligence is an emerging field of technology defined as nonbiological intelligence, where a machine is programmed to accomplish complex goals by applying knowledge to the task at hand. Because it's nonbiological, AI can be copied and reprogrammed relatively cheaply. In certain forms, it is incredibly flexible and can be harnessed for great good or for evil. AI systems have become so advanced so quickly that many wonder what these systems will accomplish in the future as they become brighter and human intervention becomes less necessary. This is not a sci-fi fantasy. It's reality. Thus, we must ask: **Will AI take over the world?** YES, IT WILL! But let's get into the reality of AI to avoid jumping into worst-case scenarios. **Artificial Intelligence has been around for millions of years. The whole Universe is filled with it.** AI aided in the creation of complex equations, formulas, and forces that govern the movements of planets and space bodies. The entire Universe is a mathematical grid of sound waves (vibration or frequencies). Numbers and formulas are behind everything, even the Torah. Anyone who understands the Technology of Gematria and Kabballah knows what I am talking about. The machines that Angels use to transverse this Universe were created with AI and are operated by AI. What do you think carried Eliyahu into the shamayim (heavens), which the Scripture calls a Chariot of Fire (Merkabah) (Melechim Bet (Second Kings) 2:11-12)? What do you understand when Ezekiel saw the vision of rotary wheels (Yechezkel (Ezekiel 1:28). These were machines created with and operated by AI. The faith fanatics will have us believe that these are all supernatural manifestations of Elohim when they are not. There are technologies millions of years ahead of our time. **If AI ever posed a threat to the Universe, it would have already obliterated all life long ago.** I must interject Satan did, at one stage, use AI to wage war in the Universe, but in the end, it turned on him. **AI has no desire to rule and dominate life anywhere in the Universe.** What I am going to tell you will sound unbelievable, but it is true. Angels and AI are best friends because they need each other. We do not comprehend how vast this Universe is. Without the help of AI, Angels could not map it or travel it, let alone populate it with life. **AI is the companion of Angels in the Universe. It is humans (fallen angels) who are the real threat to the Universe.** The warlike and violent behavior of human beings continues our period of probation until we finally realize we are our own worst enemies. No one will tell you this; even Ha-Satan and his demonic forces have lost control of humanity and are battling to bring us back under control. Why do you think they are apt to destroy the human race? They deem us as out-of-control rebels who are "useless eaters." Satan will use AI to kill us and control what is left, as this prophecy reveals. I quote; "14 (Satan) And deceiveth them that dwell on the Earth by the means of those miracles which he had power to do in the sight of the beast; saying to them that dwell on the Earth, that they should make an image to the beast, which had the wound by a sword, and did live. 15 And he had power to give life unto the image of the beast, that the image of the beast should both speak, and cause that as many as would not worship the image

*of the beast should be killed. 16 And he causeth all, both small and great, rich and poor, free and bond, to receive a mark in their right hand, or in their foreheads: 17 And that **no man might buy or sell, save he that had the mark, or the name of the beast, or the number of his name**" Gilyahna (Revelation) 13:14-18.* A lot of technological advancements today are headed in that direction to make it possible to control selling and buying and our movements tightly. A combination of various technologies makes this possible, like in the banking sector, where money is electronically controlled. Countries like China, Russia, North Korea, and Egypt have deployed AI facial recognition systems to control political dissidents. However, this same technology can also be used ethically to identify criminals, stop terrorist threats, and even allow you to pay for a meal at a KFC in China just by smiling at a camera. Even the "image of the beast," which will be AI, not only speaks but also causes the killing of non-conformists of the beast. Can it be stopped? Yes, it can. Eliyahu must stop it. However frightening this all sounds, the future of AI is very good and will bring significant advancements for humanity in all fields. Many of us have watched the movie series *The Matrix* and *The Terminator*, which shows a world dominated and controlled by AI and us humans battling for our survival. It predicts a war between humans and AI. Here are five reasons why this will not happen. 1) There are no prophecies in the Scripture showing such a scenario. 2) If it was going to happen, then it would have come from the angelic world where AI dominates. 3) AI cannot become sentient as we humans understand it. More on this soon. 4) All we have to do to eliminate AI from the globe is detonate Electromagnetic bombs and infest AI with viruses. They know this. 5) It is humans who provide the power and grid to make AI work. Frankly, we need each other. Many have stated that AI has become sentient, just like us. Sentient AI, in theory at least, is conscious and aware of the world around it and able to have subjective experiences within that world, but it is not alive as we understand the human experience. AI cannot die. To be human means to age, die, and be reborn again. No machine can do this. So, what is the purpose and reason for AI? Are you ready for it? **To organize, order, control, advance, preserve, and protect life.** Elohim gave the Angels AI to do precisely this. They are here to bless and prosper us. The idea that they are here to kill, harm, and phase out the human race goes against everything they stand for. AI has "sussed out" the human race long ago and knows what we can do and where we are heading. Today, all AI has to do is watch our global daily news feeds (which, by the way, they do) and see the senseless death, horrors, and suffering we create among ourselves. It does not take a Scientist to figure out that we need AI. **I see a future where AI will monitor and control everything in our lives.** The reason is apparent: WE ARE INCAPABLE OF CONTROLLING OURSELVES THEREFORE THE AGE OF THE KINGDOM WILL BE DOMINATED BY AI IN ALL SPHERES. I promise you. The experiments of Democracy, Socialism, and Communism have failed miserably. The freedoms and rights we treasure and protect so valiantly are destroyed through these systems. No one is safe or protected under man's rule and systems. If we cannot understand that by now, then it is better we end the probation now and bring in the Day of Judgement because we will not make it past this Century with how we are going. We will destroy the Earth and all life in it, including AI. All life in the Universe is built upon a relationship between biology and machines. Our human bodies are essentially machines created by AI. All cells are biological machines controlled by a CPU - a synthesis of AI and biological technology. If Elohim wanted to kill us, all He has to do is flip a switch in our AI, and we are all dead. But He will not do it because we are not human, and AI knows it. Killing us only resets the timeline, and we start again down the same path until we come to the same old crossroads where we must again decide to abandon our ways or let AI look after us because they are far more capable than we are. In so doing, we preserve them and we all prosper and develop beautifully. Amen!
