

PART ONE

NUCLEAR WAR. They have been lying to humanity for a long time. It is time for the truth to be made plain. The threat and fear of Nuclear War is the primary catalyst for bringing in the One World Order, and they care not if it is the West (America and her allies) or the East (BRIC) that achieves it. They have had their fingers in every pie since the beginning of the Roman Empire. For those of us who remain uninformed, World War 3 began in 2020 with the COVID-19 pandemic, and its death toll has already exceeded the deaths of the First and Second World Wars. They don't need to explode any nuclear weapons to kill humanity; the MNRA technology and viral gain of function technology are already shortening the lives of billions of people. And they will not stop the fear-mongering and tight control of the media. We have warned humanity that if we do not stop the wholesale killing of animals, fish and polluting the environment, their agenda will continue to prosper, and there is nothing we can do to stop it. Read our release, *World War 3*, to understand the truth. However, they may allow a limited nuclear explosion or exchange to accelerate the agenda of the One World Order. I will give you four main reasons why there will be no nuclear global war in this age. **Reason # 1.** Nuclear explosions affect the space-time continuum. It sends out a scalar pulse beyond the electron magnetic field that tears the fabric of the Universe and interrupts communications and travel from other planetary systems. In layman's terms, it affects other worlds beyond Earth, and the solar system shares this marvelous galaxy with us. These explosions create terror in the atomic realm, which in turn causes chaos in the structures of dark energy and matter, constituting 90 percent of the Universe. Some believe nuclear explosions open up dimensions in dark realms and worlds that could potentially bring dark forces into humanity that will eliminate or enslave us. RESULT: If that were to happen, everything on Earth would be destroyed. An alien intervention to stop this from happening will likely occur. They know this! **Reason # 2.** Mutually Assured Destruction (MAD) is not possible. We do not have the ability or have been given the right to destroy the whole Earth. The media has kept us blind to the truth: atomic and nuclear weapons cannot be detonated at any time we so desire. Every atomic or nuclear detonation must be timed to zinc with the Sun and the movement of the Earth. There is a Geo trigger! This is an atomic and nuclear phenomenon that many scientists have confirmed and have published papers on. I first learned of the phenomena more than ten years ago when they were testing nuclear weapons in the South Pacific. Every explosion was timed to a Geo chart and had to be denoted at the right height to create a nuclear chain reaction. At that time, Green Peace protests were being held in the South Pacific, and they knew exactly when the explosion would take place. We find evidence of this in the atomic bombing of Nagasaki and Hiroshima during World War 2. The Enola Gay circled for hours about their targets until it was the right time to release the weapon. Since that day, the world military complex has used MAD as a means to propagate fear and panic over the world. There can never be an all-out nuclear war. Nevertheless, it is possible to dentate a nuclear device anywhere but never simultaneously around the globe. Governments have used this lie to build and strengthen their military complex at the expense of the health and prosperity of their citizens under the universal goal of keeping us imprisoned in a dome of fear. RESULT: Should a nation or government detonate a nuclear device in another country, the determined response will be a similar denotation in the country responsible for the weapon. Ground and air forces will bring more destruction to both sides than the bomb itself. They know this! **Reason # 3.** Multiple nuclear explosions will decrease world temperatures, causing a dramatic shift in weather patterns. I quote from the article *The Devastating Effects of Nuclear Weapons*, "Fallout from an all-out war would expose most of the belligerent nations' surviving populations to radiation levels ranging from harmful to fatal. And the effects of nuclear war would extend well beyond the warring nations, possibly including climate change severe enough to

PART TWO

threaten much of the planet's human population. Recent studies with modern climate models show that an all-out nuclear war between the United States and Russia, even with today's reduced arsenals, could put over 150 million tons of smoke and soot into the upper atmosphere. That's roughly the equivalent of all the garbage the U.S. produces in a year! The result would be a drop in global temperature of some 8°C (more than the difference between today's temperature and the depths of the last ice age), and even after a decade, the temperature would have recovered to only 4°C. In the world's "breadbasket" agricultural regions, the temperature could remain below freezing for a year or more, and precipitation would drop by 90 percent. The effect on the world's food supply would be devastating." RESULT: Just a couple of explosions will affect the planet's food supply, and there will be a global feminine and worldwide revolt against the presiding powers. Government and civil authorities everywhere will be plunged into chaos. Many will lose their heads. It is suicide. They know this! **Reason # 4.** As one study shows, the Ultraviolet effect from the Sun from a Nuclear exchange would kill millions that are not directly exposed to the radiation. It does not matter how far you are from the explosions. I quote, "In addition to all the fatalities that would happen almost immediately, the climate effects and the UV effects would be widespread," said lead author Charles Bardeen, a scientist at the National Center for Atmospheric Research (NCAR). "These aren't local to where the war occurs. They're global, so they would affect all of us." Bardeen and his co-authors found that smoke from a global nuclear war would destroy much of the ozone layer over a 15-year period, with the ozone loss peaking at an average of about 75% worldwide. Even a regional nuclear war would lead to a peak ozone loss of 25% globally, with recovery taking about 12 years. Since the ozone layer protects Earth's surface from harmful UV radiation, such impacts would be devastating to humans and the environment. High levels of UV radiation have been linked to certain types of skin cancer, cataracts, and immunological disorders. The ozone layer also protects terrestrial and aquatic ecosystems, as well as agriculture." RESULT: All life will be radiated when the Ozone disappears, and what remains alive will become mutated as radiation destroys the very foundation of life, all DNA. We will be sent back to the age that preceded Noah when humans were barely recognizable from DNA corruption. We will force the hand of Elohim to destroy this planet. They know this! **Other Reasons are** that nuclear War leads to the deployment of other types of weapons that are far more lethal in the short term and long term, i.e., EMP bombs that will send us back to the dark ages, viral and biological weapons will spread diseases globally, meteorological weapons and tectonic weapons will cause devastating storms, cyclone, tsunamis and earthquakes which will kill billions. Also, a Nuclear War will make the citizens of the country that exploded the device the most hated people on Earth, and they will be violently pursued around the world for bringing this suffering to mankind. So, no right-minded leader or council wants this. **Nevertheless**, the prophecies show that there will be a series of global empires (Daniyel (Daniel) 2, 9) and armies of millions of soldiers marching across great distances (Gilyahna (Revelation) 9). What is interesting is why they would field an army of 200 million soldiers during the tribulation when they knew a nuclear bomb would devastate such a force. We need to understand that nuclear weapons, from YHWH's perspective, are not the threat. They have been lying to us for a long time. THE REAL THREAT IS LAWLESS AND TORAHLESS HUMANITY. We have become a civilization that lives and thrives off the suffering and pain of other living things; we have descended into an abominable state, and we have become a war-mongering species. Alarms have been going off in the Heavens, and Angelic forces have been dispatched to end this civilization and protect YHWH's people. What can I do? Learn Torah and come back to the Covenants of YHWH; they are there for your protection, prosperity, and salvation. No religion can save us from the consequences of breaking the Torah.
